- Certification in Front End fundamentals (**HTML,CSS,& JavaScript**).
- Successfully completed **ReacJs** course from **CYBROM TECHNOLOGY**, Bhopal.
- Successfully completed Django course from CYBROM TECHNOLOGY, Bhopal.

PROJECTS

- Project: **Real-time Chat Application**
- Description: Developed a real-time chat application using **React** for the frontend and **Firestore** for the backend. Implemented user authentication with Google sign-in, real-time messaging, and multiple chat rooms. Ensured a responsive and user-friendly interface.
- Technologies Used: **React, Firestore** (Authentication, Firestore), CSS

- Project: **Student Management System**
- Language of Implementation: **Python**
- Description: Developed a Student Management System using Python, focusing on file handling to streamline school administrative activities. The system allows for student registration, marksheet generation, and includes an admin panel for managing student information and marksheets. This project efficiently stores and tracks student workload and personal information.
